CONTACT INFORMATION	177 Oakville Dr APT TA Pittsburgh, PA 15220 USA	codyperri2@yahoo.com https://linkedin.com/in/codyperri2 +1 (724)-900-3860
OBJECTIVE	Logistician seeks full-time position with established shipping company in the Pittsburgh area.	
PROFESSIONAL INTERESTS	Logistics, Reporting, Project Planning and Management Especially Involving Applied Mathematics	
EDUCATION	Southern New Hampshire University	4.0
	Bachelor of Applied Mathematics	2022 – Present
	Kent State University	3.25
	General Studies (no major)	2014 – 2015
	North Allegheny Senior High School	General
	High School Diploma	2010 – 2014
	Assistant Manager	
	<i>Amazon.com, LLC</i>	Aug 2018 – Sep 2022
	I covered changing roles on the overnight sort shift including shift planning, monitoring and managing associate performance, and quality assurance. In Spring 2020, I took ownership of COVID-19 rollouts including training associates in temperature screening procedures, adjusting the building layout to meet social distancing guidelines, and consistently working with others to ensure up to date signage was posted site-wide. In September 2020, I transferred buildings to assist with the launch of the region's newest delivery station. I started on the load out shift: my responsibilities included ensuring routes were scheduled for the correct times and monitoring route progress. In addition to my previous COVID-19 responsibilities, I handled preparing and overseeing testing—including the shipment of completed tests. In July 2021, I began overseeing the overnight shift in addition to the load out shift, where my responsibilities reflected a combination of both shifts.	
	Caterer	
	<i>John Marshall Catering</i>	Jan 2015 – Dec 2018
	Delivery Driver/Dishwasher	
	<i>Totin's Diner</i>	Oct 2012 – Sep 2018

RELEVANT
SKILLS

Leadership

Team Building, Project Management, and Professional Development

- *Team Building*: Basics of LEAN/6 σ ; Coaching and feedback to and from coworkers; Commitment to earning trust of those I lead; Adapting roles of a team to constantly changing environments; Achieving success when under stress by doing our best; Active listening and responding to the views of others.
- *Project Management*: Implementing projects related to COVID-19; Successfully ushering projects from conception to completion; Adapting to changing customer requests; Achieving more with less.
- *Professional Development*: Training associates in a variety of pathways; Clearly communicating standard operating procedures; Helping others develop themselves; Facilitating job rotation and remedial training for associates as needed.

Analytics

Deep Diving Data, Problem Solving, and Applied Mathematics

- *Deep Diving Data*: Efficiently correlating data to show trends and root causes; Using Microsoft Excel to express and analyze data over time; Insisting on the highest standard of investigation to ensure solutions are effective.
- *Problem Solving*: Using the "5 Whys" to ensure the problem being solved is actually the problem at hand; Ensuring all voices are heard when gathering information; Taking an open-minded approach to each issue, making sure each solution is also a lesson learned for my team.
- *Applied Mathematics*: Learning constantly while pursuing Bachelor's Degree in Applied Mathematics; Finding new ways to utilize educational background in the professional sphere; Cultivating a deep desire to learn and improve myself each day.

RELEVANT
INTERESTS

Problem Solving

Achieving Success in Changing Environments

- *Mathematical Background*: I enjoy finding patterns in data and trends over time. I want to eventually transition to a position in the applied mathematics field. I am not intimidated by large or complicated data sets.
- *Logistics*: I enjoy the process of ensuring efficient delivery of goods. I am deeply familiar with the different roles a delivery station takes through that process. I am passionate about the customer experience and delivering on the customer promise.
- *Varied Working Environment*: I do best in roles where the work changes from day to day, and my team and I need to adapt in a fast-paced environment. I enjoy leading a team to success even when things get difficult, and improving myself and my team over time. I love the opportunity to tackle a problem I have yet to attempt to solve.
